

Release notes Adhese 3.0.5

Fixes and improvements

- Adhese now supports comments in the template files.
- During publishing, a list of click domains from Advar templates is exported to whitelist these domains. This solves the problem for first-party domains that do not allow trusted third-party click URLs.
- Support for MP3 (audio) creatives. MP3 is added to the format types:

Type	
	☒ 3rd. Party Image - image/gif
	☒ 3rd. Party URL - iframe
	☒ Adhese Advar - application/x-adhese-advar
	☒ Adhese Advar - application/x-adhese-advar
